SPECIAL ISSUE

Project for Intercomparison of Landsurface Parameterization Schemes, Phase 2(e)

Edited by D.P. Lettenmaier, A.J. Pitman

Preface vii

Simulation of high-latitude hydrological processes in the Torne–Kalix basin: PILPS Phase 2(e): 1: Experiment description and summary intercomparisons
L.C. Bowling, D.P. Lettenmaier, B. Nijssen, L.P. Graham, D.B. Clark, M. El Maayar, R. Essery, S. Goers, Y.M. Gusev, F. Habets, B. van den Hurk, J. Jin, D. Kahan, D. Lohmann, X. Ma, S. Mahanama, D. Mocko, O. Nasonova, G.-Y. Niu, P. Samuelsson, A.B. Shmakin, K. Takata, D. Verseghy, P. Viterbo, Y. Xia, Y. Xue and Z.-L. Yang. 1

Simulation of high latitude hydrological processes in the Torne–Kalix basin: PILPS Phase 2(e): 2: Comparison of model results with observations
B. Nijssen, L.C. Bowling, D.P. Lettenmaier, D.B. Clark, M. El Maayar, R. Essery, S. Goers, Y.M. Gusev, F. Habets, B. van den Hurk, J. Jin, D. Kahan, D. Lohmann, X. Ma, S. Mahanama, D. Mocko, O. Nasonova, G.-Y. Niu, P. Samuelsson, A.B. Shmakin, K. Takata, D. Verseghy, P. Viterbo, Y. Xia, Y. Xue and Z.-L. Yang. 31

Simulation of high-latitude hydrological processes in the Torne–Kalix basin: PILPS Phase 2(e): 3: Equivalent model representation and sensitivity experiments
L.C. Bowling, D.P. Lettenmaier, B. Nijssen, J. Polcher, R.D. Koster and D. Lohmann 55

Impacts of model calibration on high-latitude land-surface processes: PILPS 2(e) calibration/validation experiments
J. Jin, X. Gao and S. Sorooshian 73

Timescales of land surface evapotranspiration response in the PILPS phase 2(c)
D. Lohmann and E.F. Wood 81

The role of aerodynamic roughness for runoff and snow evaporation in land-surface schemes—comparison of uncoupled and coupled simulations
P. Samuelsson, B. Bringfelt and L.P. Graham 93

Important factors in land–atmosphere interactions: surface runoff generations and interactions between surface and groundwater
X. Liang and Z. Xie 101

Aggregated and distributed modelling of snow cover for a high-latitude basin
R. Essery 115

The CHAmeleon Surface Model: description and use with the PILPS phase 2(e) forcing data
A.J. Pitman, Y. Xia, M. Leplastrier and A. Henderson-Sellers. 121

Simulation of a Scandinavian basin using the diffusion transfer version of ISBA
F. Habets, A. Boone and J. Noilhan. 137

Variable infiltration capacity cold land process model updates
K.A. Cherkauer, L.C. Bowling and D.P. Lettenmaier 151

Developments in the MOSES 2 land-surface model for PILPS 2e
R. Essery and D.B. Clark 161

The Torne-Kalix PILPS 2(e) experiment as a test bed for modifications to the ECMWF land surface scheme
B. van den Hurk and P. Viterbo. 165

The Versatile Integrator of Surface and Atmosphere processes: Part 1. Model description
Z.-L. Yang and G.-Y. Niu 175

The versatile integrator of surface atmospheric processes: Part 2: evaluation of three topography-based runoff schemes
G.-Y. Niu and Z.-L. Yang 191
Development of the minimal advanced treatments of surface interaction and runoff
K. Takata, S. Emori and T. Watanabe 209

Research Papers
LGM lake records from China and an analysis of climate dynamics using a modelling approach
G. Yu, B. Xue, J. Liu and X. Chen. 223
Diatom response to recent climatic change in a high arctic lake (Char Lake, Cornwallis Island, Nunavut)
N. Michelutti and J.P. Smol. 257
Late Quaternary lake-level changes constrained by radiocarbon and stable isotope studies on sediment cores from Lake Titicaca, South America
H.D. Rowe, T.P. Guilderson, R.B. Dunbar, J.R. Southon, G.O. Seltzer, D.A. Mucciarone, S.C. Fritz and P.A. Baker . . 273
An examination of short- and long-term air–ground temperature coupling
H. Beltrami and L. Kellman 291
Thermal pollution causes global warming
B. Nordell 305
Simulating vegetation cover dynamics with regards to long-term climatic variations in sub-arctic landscapes
H.V. Haraldsson and R. Ólafsdóttir 313
The possible response of life zones in China under global climate change
X. Chen, X.-S. Zhang and B.-L. Li. 327
